

Colour Vision Deficiencies V

Proceedings of the Fifth Symposium of the International
Research Group on Colour Vision Deficiencies held at St
Mary's College, Strawberry Hill, London, 26–28 June 1979

Colour Vision Deficiencies V.

1. Colour blindness – Congresses

I. Title II. Verriest, Guy

617.7'5 RE921

ISBN 0-85274-415-3

The Fifth Symposium on Colour Vision Deficiencies was organised by the International Research Group on Colour Vision Deficiencies

IRGCVD Committee

J François (*President*), G Verriest, R Lakowski and M Marré

Organising Committee

G Verriest (*Belgium*), K H Ruddock (*UK*) and J Birch (*UK*)

Honorary Editor

G Verriest

Text set in 10/12 pt Press Roman by Adlard and Son Ltd, and printed in Great Britain by J W Arrowsmith Ltd, Bristol.

Published by Adam Hilger Ltd, Techno House, Redcliffe Way, Bristol BS1 6NX, England. The Adam Hilger book-publishing imprint is owned by The Institute of Physics.

Contents

v Preface

Chapter 1: Neuro-anatomy of colour vision processes

- 1–14 Photoreceptor-specific synaptic pathways in goldfish retina: a world of colour, a wealth of connections
INVITED *W K Stell*
- 15–29 Retinal colour channels and their neurotransmitters
INVITED *R E Marc*
- 30–44 Blue receptor distribution in primates from intense light and histochemical studies
INVITED *H G Sperling*
- 45–50 Evidence for a GABA-ergic feedback loop in the outer plexiform layer of the vertebrate retina
M B A Djamgoz and K H Ruddock
- 51 Neuronal responses to long wavelengths: investigation on the primate lateral geniculate body
O Creutzfeldt
- 52–60 Long-term and progressive changes in rhesus spectral sensitivity after low-level coherent light (514 nm) exposure
H Zwick, E S Beatrice and T A Garcia
- 61–64 Primate microspectrophotometry and its implications for colour deficiencies
J K Bowmaker and J D Mollon
- 65–68 Rectangular chromaticity diagram showing cone excitations at constant luminance
D I A MacLeod and R M Boynton

Chapter 2: Colour vision in relation to other visual functions in clinical ophthalmology

- 69–82 Cone dysfunction syndromes defined by colour vision
INVITED *V C Smith and J Pokorny*
- 83–88 Colour vision in relation to the clinical features and extent of field loss in diabetic retinopathy
J Birch, A M Hamilton and E S Gould

- 89–98 Colour vision in relation to perimetric and dark adaptation functions in glaucomatous eyes
R Lakowski, S M Drance and A Carsh
- 99–105 Human vision without tonic ganglion cells?
P E King-Smith, J G Rosten, S Alvarez and S K Bhargava
- 106–110 Changes in spectral acuity following brief laser (647 nm) exposure
D O Robbins and H Zwick
- Chapter 3: Stiles, mechanisms and colour vision at high luminances**
- 111–114 The two-colour threshold method and π mechanisms: historical note
INVITED *W S Stiles*
- 115–121 Psychophysical evidence concerning independent processing of visual stimulus parameters
K H Ruddock
- 122–125 Stiles, mechanisms in clinical ophthalmology
F Carta, M Maione, S Lettieri and L Bondi
- 126–129 Further studies on Stiles' technique in acquired dyschromatopsias
J L Vola, C Carruel and L Cornu
- 130–135 On the presence of three cone mechanisms in a case of total achromatopsia
J D Mollon, F Newcombe, P G Polden and G Ratcliff
- 136–139 Colour matching at high illuminances
D A Palmer
- 140–142 Luminance dependence of anomaloscope matches
S M Pereira
- 143–144 Influence of illumination on the discrimination of colorimetric purity
M L F de Mattiello and M Guirao
- 145 Influence of the spectral distribution of the illuminant on the results of clinical colour vision tests at high-level luminance
G Leprince, J L Vola and D Langle
- 146–150 Coherency effects on retinal neural processes (ERG) of *Pseudemys*
H Zwick and D L Jenkins
- 151–156 Changes in tectal spectral sensitivity and receptive field organisation following coherent light exposure
H Zwick, D O Robbins and A Knepp
- 157–161 The disturbance of colour vision after sunbathing
E Hansen
- 162–163 Illuminance and the FM 100 hue test
S J Dain, S M Pereira, B Palmer, P Lewis and T Hammond

Chapter 4: Methods of examination

- 164–171 An application of decision theory to colour vision testing
A R Hill and P A Aspinall
- 172–180 The Besançon anomalometer
A Roth, C Repiquet, J C Renaud and J Ch Vienot
- 181–183 A solid state anomaloscope
S J Dain, G Strange and R Boyd
- 184–188 An experimental anomaloscope based on the interference filter system, and test results
Y Ohta, Y Izutsu, T Miyamoto and K Shimizu
- 189–191 A modified anomaloscope using optokinetic nystagmus to define colour matches objectively
J D Moreland
- 192–194 New equipment for the rapid taking of spectral sensitivity curves for normal and defective colour vision
M Richter
- 195–196 Second edition of the City University test
R Fletcher
- 197–199 Assessment of the FM 100 hue derivative tests
S J Dain
- 200–203 Evaluation of the standard pseudoisochromatic plates (first edition)
K Hukami, H Ichikawa and S Tanabe
- 204–206 Testing the Daltonic child
R Fletcher
- 207–210 Influence of retinal locus on the discrimination of colorimetric purity
R A Arizaga and M L F de Mattiello
- 211–216 Human colour vision mechanisms along four cardinal meridians
H Obstfeld
- 217–220 New targets for clinical colour perimetry
S J Dain, D Bard and G Sue
- 221–225 A preliminary report on the use of colour filters in the Mark II visual field analyser
A I Friedmann

Chapter 5: Congenital defects

- 226–236 A model combining trichromatic and dichromatic vision
W Paulus and A Kröger-Paulus

- 237–239 Spectral mixture curves with interference filters for monochromatic, dichromatic and trichromatic subjects
G Vogt
- 240–243 Increment flicker and hue spectral sensitivity functions in normals and dichromats: the effect of flicker rate
R L Klingaman, E Zrenner and M Baier
- 244–246 Colour vision deficiencies in Saudi Arabia
J Voke and P Voke
- 247–250 Red–green colour defect among the Roman Catholic and non-denominational population of Glasgow
S R Cobb
- 251–255 Incomplete achromatopsia in Bishnupur: genetics and heterozygote problems
R W Pickford, R Pickford, J Bose, B S Joardar, P K Nag, G G Ray and R N Sen
- 256–260 Frequency of tritan disturbances in a population study
L van Heel, L N Went and D van Norren
- 261–267 Decision uncertainty for a homozygous or heterozygous female
A R Hill
- 268–272 Two cases of inherited deutan and tritan disturbances in the same person, and a study of their families
S van de Merendonk and L N Went
- 273–277 Characteristics of genetic carriers of congenital colour vision defects: deuterocarriers
T Yasuma, H Ichikawa and S Tanabe

Chapter 6: Acquired defects

- 278–279 Boynton's colour-naming method in acquired dyschromatopsias
P Lanthony
- 280–284 Colour vision in a case of retinopathia pigmentosa
E Wolf, H Scheibner and G Paschke
- 285–292 Study of familial retinitis pigmentosa sine pigmento combined with cystoid maculopathy
K M Robertson and J D Moreland
- 293–294 Colour vision in central and peripheral tapetoretinal dystrophy
K Antalová
- 295–298 A comparison of colour vision with other methods of clinical assessment in diabetics with macular oedema
I S Begg and R Lakowski

- 299–305 Tritanomalouscopy of diabetics undergoing photocoagulation therapy
J D Moreland
- 306–309 Visual acuity and colour vision in central serous retinopathy
C M Williams and P K Leaver
- 310–313 Chromatic discrimination and haematological data in beta-thalassaemia and diabetes juvenilis
A Serra, C Mascia, C Dessy and R Casti
- 314–316 Differences in adaptation and colour sensation between the eyes of a patient with latent ocular herpes
H Kalmus
- 317–319 Drug-induced colour vision deficiencies
O Lagerlöf
- 320–326 Colour vision deficiencies detected by Farnsworth's 100 hue test in patients under long-term treatment with digitalis
J G Alken, A Miller, R Semjan and N Rietbrock

Chapter 7: Practical aspects of colour vision deficiencies

- 327–330 An evaluation of the Ames Clinitest
P A Aspinall, A R Hill and D Cameron
- 331–342 New investigations into the relationships between congenital colour vision defects and road traffic safety
G Verriest, O Neubauer, M Marré and A Uvijls
- 343–345 The effect of industrial exposure to lead
S R Cobb and F G Shaw
- 346–350 Colour vision defects and electronics
G Verriest and A Uvijls
- 351–354 Does a tri-band illuminant improve performance in colour vision defective people?
G Verriest and A Uvijls

Chapter 8: Various subjects

- 355–359 Age changes in ocular media density and consequences for colour vision
J S Werner and B R Wooten
- 360–364 Some remarks on visual acuity, colour discrimination and entoptical scatter, in subjects of different ages
L R Ronchi, L Barca, R P Perini and G Vaccari

- 365–370 Forced-choice colour discrimination in the dark-adapted parafovea
B Drum
- 371–374 Determination of post-receptoral spectral functions in humans
K H Ruddock and V A Waterfield
- 375–380 Testing dark adaptation with two-colour stimuli
I Schmidt
- 381–384 Some further observations on the colour flicker phenomenon
A R Hill, G Rodger and L Smalridge
- 385–388 Transient responses to Rayleigh matching
F T Arcetri and L R Ronchi
- 389–390 The retinal origin of transient tritanopia determined with the local electro-
retinogram
J M Valeton and D van Norren

Chapter 9: A review

- 391–402 Review: colour vision at low illumination levels
K H Ruddock
- 403–405 **Addenda**
- 407–408 **Author Index**
- 409–410 **Subject Index**
