Colour Vision Deficiencies VII

Proceedings of the Seventh Symposium of the
International Research Group on Colour Vision
Deficiencies held at Centre Médical Universitaire,
Geneva, Switzerland, 23–25 June 1983

Edited by G. Verriest

CONTENTS

1. OBITUARIES

- A tribute to Louise L. Sloan
by R. W. Massof 1
- Dr Oskar Neubauer
by Th. Neubauer, U. Nemetz, M. Marré and G. Verriest 7

2. ELECTROPHYSIOLOGY AND COLOUR VISION

- Electrophysiology of color vision. I. Cellular level
(invited paper)
by F. M. de Monasterio 9
- Electrophysiology of colour vision. II. Studies on colour
vision by means of the electroretinogram and the visually evoked
cortical potential: a review (invited paper)
by E. Zrenner 29
- ERG indices of color vision variations in monkeys
by G. H. Jacobs and J. Neitz 49
- Correlates between chromatic electrophysiological recordings and
chromatic psychophysical functions in normal and abnormal
observers
by M. L. F. de Mattiello, A. Biondini and H. Franco 55
- Visual evoked potentials and colour pattern stimulations
by Y. Grall, Y. Boiteux, J. F. Le Gargasson, J. Keller and F.
Rigaudière 63
- Spectral response pattern of ERG recorded with scanning method in
congenital colour defectives
by Y. Uji and M. Yokoyama 73

3. METAMERIC MATCHES RELEVANT FOR ASSESSMENT OF COLOUR VISION

Metameric matches relevant for assessment of color vision. I. Theoretical considerations (invited paper) by J. Pokorny and V. C. Smith	83
Metameric matches relevant for assessment of color vision. II. Practical aspects (invited paper) by A. Roth	95
Analysis of variance in anomaloscope matches by J. D. Moreland	111
Color matches on large fields, changes with retinal area stimulated or with duration of presentation by F. Viénot	121
Retinal distribution of macular pigment by J. D. Moreland and P. Bhatt	127
Brightness–luminance discrepancy in the frame of colour vision deficiencies by L. R. Ronchi, R. Paoletti-Perini, S. Ferenczi and J. Makai	133
Clinical colorimetric examinations in the purple by A. Roth and D. Hermes	141
Dichromatic and anomalous trichromatic colour vision examined with small and large field matches by means of the projection anomaloscope by W. Jaeger and H. Krastel	147
Influences of variation in lenticular and macular pigmentation on dichromatic neutral points by R. Kliegl, V. J. Volbrecht and J. S. Werner	155
Rayleigh equation in acquired color vision defects by M. Marré and E. Marré	165

4. CLINICAL COLOUR VISION TEST BATTERIES

Clinical color vision examination (invited paper) by A. Pinckers	171
Principles of colour vision test battery selection by A. R. Hill, P. A. Aspinall and G. Verriest	181
Acquired defects of colour discrimination statistically evaluated through a battery of tests by A. Serra, C. Mascia, C. Dessy, M. Siotto and R. Casti	189
The contribution of the City University test (1st and 2nd editions) in a clinical test laboratory by J. Birch	193

5. METHODS OF EXAMINATION

New pseudoisochromatic plates for acquired color vision defects by S. Tanabe, K. Hukami and H. Ichikawa	199
Pseudoisochromatic charts in acquired dyschromatopsia by O. Lagerlöf	205
Influence of some factors on not-typical responses to three tests of color vision in children by J. Perales and E. Hita	211
Comments on the use of the Standard Pseudoisochromatic plates and the New Color Test of Lanthony by J. Birch and L. Hamon	221
The effect of age on performance on the Panel D-15 and desaturated D-15: a quantitative evaluation by K. J. Bowman, M. J. Collins and C. J. Henry	227
An analysis of the Farnsworth-Munsell 100-Hue test by K. Kitahara	233
On the comparison of monocular and binocular 100-Hue responses by A. Serra, L. R. Ronchi and M. Siotto-Pinto	239
Validity of different contrast tests in glaucoma by A. Gonella and M. L. F. de Mattiello	247
Saturation contrasts: clinical application potential by M. L. F. de Mattiello and A. Biondini	253
Psychophysical flicker threshold in congenital colour vision defi- ciencies: clinical and ergophthalmological aspects by J. J. Meyer, L. Zoganas, J. Pittard, D. Hermes and A. Roth	259
A clinical evaluation of the 'OSCAR' color vision set by C. R. Cavonius and J. Kammann	275
Value of the Rodenstock Farbentestscheibe 3040.173 for the diagnosis of congenital colour vision defects by G. Verriest and A. Uvijls	281
A revised three-light test by R. Fletcher	287
A new pocket anomaloscope by F. Bolle and H. Krastel	289
Presentation of a design to measure the McCollough effect by J. L. Vola, P. Gastaud and J. Leid	295

6. CONGENITAL DEFECTS

Spatial summation in dichromats by S. J. Dain and B. Duffield	299
Microspectrophotometric and psychophysical results for the same deuteranopic observer by J. D. Mollon, J. K. Bowmaker, H. J. A. Dartnall and A. C. Bird	303

Mesopic deuteranopic vision with a large observation field by P. Scheufens and H. Scheibner	311
Achromatopsia and combination defects of protan, deutan and tritan genes by L. N. Went and N. Pronk	319

7. ACQUIRED DEFECTS

The three color vision mechanisms in different field sizes in acquired color vision defects by M. Marré and E. Marré	325
Clinical application of the transient tritanopia effect by K. Ichikawa, M. Hoshino and H. Ichikawa	329
Saturation discrimination in acquired colour vision deficiencies on the tritanopic confusion line by T. Miyamoto, Y. Ohta, E. Tanabe, T. Motohashi and K. Shimizu	335
Colour vision in a case of unilateral nuclear cataract by E. Wolf and G. Kluxen	343
Color discrimination (100-Hue test) after successful surgical treat- ment of retinal detachment by L. Barca, A. De Luca and F. Passani	349
Retinal drusen and colour vision by J. L. Vola, C. Poli, P. Gastaud and G. Leprince	355
A quantitative assessment of colour discrimination in normal vision and senile macular degeneration using some colour confusion tests by K. J. Bowman and K. D. Cameron	363
Colour vision in relation to other visual functions in the presence of slight macular degeneration by D. Trusiewicz, A. Kordalewska and K. Żebrowska	371
Colour vision in young diabetics by J. M. Bronte-Stewart, J. S. Cant and J. O. Craig	377
The regression between FM 100-Hue test scores and age in preretino- pathic diabetes by M. Maione, L. Scoccianti, M. C. Tomba and L. Arsenio	383
The performance at the FM 100-Hue test as a risk factor for diabetic retinopathy by M. Maione, A. Strata, L. Scoccianti, G. Bontempelli, D. Berardi, R. Carnevali, M. G. Tardini and S. Caronna	387
Urine testing inaccuracies among diabetic patients with colour vision deficiency by G. H. Bresnick, J. Crawford and A. Groo	393

Correlation between color vision deficiency and results of clinical examination in glaucomatous patients by T. Steinschneider, U. Ticho and D. Adler	407
Night blindness with a tritan colour vision defect by E. Wolf and U. Weber	413
Transient cerebral achromatopsia by A. B. Safran, W. R. Felgenhauer and A. Roth	419

NOTE

Although regularly presented at the Geneva symposium, the paper of Dr. Cl. Magis entitled "Compared geometric properties of chromaticity diagrams" is not included in this proceedings volume by decision of the IRGCVD directorial committee, its subject being outside the scope of the group.
